

Data Protection

My website anjaeichler.com does not collect any data about visitors and does not set any cookies. For reasons of data protection we do not use social media buttons, statistics and Google fonts. I do not collect any personal data unless you actively contact me and send me an email.

This site is built with wix.com. I have no influence on their privacy policy, therefore the following statements: Wix.com collects cookies. A window in the lower part of the website will inform you about this. For further information please follow the link <https://www.wix.com/about/privacy>

Dealing with personal data

Personal data is information with which a person can be identified, i.e. information that can be traced back to a person. This includes the name, e-mail address or telephone number. But also data about preferences, hobbies, memberships or which websites have been viewed by someone else are considered personal data. Personal data is only collected, used and passed on by the provider if this is permitted by law or if the users agree to the collection of data.

Access data/ server log files

The provider (or its web space provider) collects data about every access to the offer (so-called server log files). These access data include: Name of the accessed website, file, date and time of access, transferred data volume, notification of successful access, browser type and version, the user's operating system, referrer URL (the previously visited page), IP address and the requesting provider. The provider uses the protocol data only for statistical evaluations for the purpose of operation, security and optimization of the offer. However, the provider reserves the right to check the protocol data subsequently if there is a justified suspicion of illegal use based on concrete evidence.

Cookies

Cookies are small files that make it possible to store specific information relating to the device on the user's access device (PC, smartphone or similar). On the one hand, they serve the user-friendliness of websites and thus the users (e.g. storage of login data). On the other hand, they serve to record statistical data on website use and to be able to analyse it for the purpose of improving the offer. The users can influence the use of cookies. Most browsers have an option to restrict or completely prevent the storage of cookies. However, it should be noted that the use and especially the comfort of use are generally limited without cookies. (The pages of artfree, however, function without restriction.)

Integration of services and contents of third parties

It can happen that within this online offer third party content, such as videos from YouTube, map material from Google Maps, RSS feeds or graphics from other websites are integrated. This always presupposes that the providers of these contents (hereinafter referred to as "third-party providers") are aware of the IP address of the users. Without the IP address, they would not be able to send the content to the browser of the respective user. The IP address is therefore necessary for the display of this content. I make every effort to use only such content whose respective providers use the IP address only to deliver the content. However, I have no influence on this if the third-party providers store the IP address for statistical purposes, for example. As far as this is known to me, I inform the users about this.
